For entrants in FY 2020

Appended Form 1

Specifications for Major Program

Name of School (Department) [Integrated Arts and Sciences(Integrated Global Studies)]

Program name (Japanese)	国際共創プログラム
(English)	Integrated Global Studies

1. Degree Awarded : Bachelor of Arts and Sciences

2. Overview

The program of Integrated Global Studies has three basic principles – integrated thinking, global vision, and cooperative action – with the aim of fostering professionals who are able to discuss the various challenges facing international society from a global perspective, overcoming the differences that exist between nations, ethnic groups, cultures, and religions, and to engage in cooperative action with others. It encourages students to enhance their command of English and Japanese for communication, and offers a specialized education built on a foundation of a liberal arts education.

As such, students acquire the basic knowledge and methodologies of various academic fields through their study of the multidisciplinary subjects in the School of Integrated Arts and Sciences. This is intended to form the basis from which they will be able to discuss the various problems facing international society. Based on these, they take IGS subjects from three fields – *Culture and Tourism*, *Peace and Communication*, and *Environment and Society* – in order to acquire the knowledge and skills required for the practice of integrated global studies. This program values the student's self-initiative in choosing courses: students can either balance the three fields in order to acquire a core of knowledge and skills, or they can focus on subjects based on one field according to their respective goals and interests.

In addition, in this program, students from various nationalities and language backgrounds study together using English as a common language. The classes often employ group discussion and active learning. The students work and learn in English, in collaboration with students from different nationalities, in order to eventually acquire the flexibility and cooperative attitude necessary for working together with people from diverse cultural and religious backgrounds, an attitude of respect for different cultures, great sensitivity, and the ability to negotiate and express opinions in English.

Students who have obtained such capabilities can choose their career path in the future as follows; they can work in leadership roles in international institutions or companies that are growing internationally, and in government organizations in their own native countries; they can also work as researchers by going on to graduate school, in Japan or overseas, to continue their studies into the various challenges facing international society.

3. Diploma Policy (Policy for awarding degrees and goal of the program)

The Integrated Global Studies Program has three basic principles – *Integrated Thinking*, *Global Vision*, and *Cooperative Action* – with the aim of fostering self-motivated and independent professionals, who are able to grasp issues from a global perspective that crosses the differences that exist between nations, ethnic groups, cultures, and religions, and have the interdisciplinary knowledge and wide range of insights, based on technical knowledge and thinking abilities, that are required in order to identify issues, analyze their causes, and find solutions. The program requires students to enhance their language skills for communication, and to take a specialized education built on the foundation of a liberal arts education. The program enables students to collaborate with others in different positions, and to work cooperatively for solutions in order to develop their ability to put integrated global studies into practice.

This program awards “Bachelor of Arts and Sciences” to students who have acquired the required number of credits set forth in the curriculum and acquired the following abilities:

(1) Integrated Thinking: Understand and analyze the various challenges confronting the international community from multifaceted perspectives transcending disciplinary boundaries between the humanities and sciences.

506-7.1 (l)T3.172 (the)Inreg-8 ((nsr)-6ETQdd 3.1 (oba)--13.1 (b-12.3 (a)13.2 (oq s)-TQ

(2) Global Vision: Understand others irrespecs (r)-6.3 (r)-e (ed)-12.2 9.96 -0 0 9.96 46.8 628.08 Tm3.2 (p s)-8

d. The dean is generally responsible for its evaluation and improvement.

(2) Evaluation of the Program

a. Perspectives for program evaluation:

- Is the education curriculum systematically and appropriately arranged to attain its goals?
- Are the contents of the lessons appropriate in relation to the system?
- Has it been shown that students can attain the goals above the standard?

b. Method of evaluation

- After the final class of each semester is completed, students answer a questionnaire for class evaluation.

c. The perspective and method of feedback to the students

- Class evaluations are made in the Department of Integrated Global Studies using the professors' comments and the results of the students' questionnaires for improvement.
- Overall program evaluation is made from working in partnership with the Academic Affairs Committee of School, the Graduate School Head Office, and the Evaluation Committee.
