

Plant polyphenol as a feed additive

Speaker: Dr. Anuraga Jayanegara

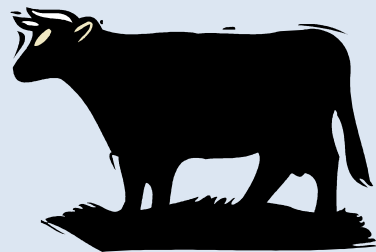

Faculty of Animal Science

Bogor Agricultural University, Indonesia

Date/time: July 4, 2018 (Wed) 15:00~16:00

Venue: Graduate School of Biosphere Science
Room C301

Various plant polyphenols, such as tannin, have functional roles in the digestion and nutrient metabolism affecting animal productivity, enteric methane emission, and product quality. In this lecture, recent topics related to polyphenol as feed additives will be presented.

This lecture is approved as a common seminar for 5 graduate schools

Correspondence: Dr. Taketo Obitsu
