		Hiroshima	8 15 2 Hiroshima 40 2 19 1 20 1 10 2	
		Japanese Experience of Social Development-Economy, Infrastructure, and Peace	<p>This course intends to discuss the issues of SDGs under the Guiding principles of Hiroshima University "Pursuit of Peace" and the long-term vision "Splendor Plan 2017". The SDGs sets sustainability as a core of the global issues. Such a broad issue always involve many related issues. Resolution of one issue may produce another issue. It is important to consider cross-disciplinary approach and hisotorical aspect. Also inclusiveness is an important principle of SDGs, and thus all countries, developed and developing countries, should collaborate to tackle these.</p> <p>When considering these cross-disciplinary approach, history, and inclusiveness of development, Japanese experience of development provides an important case, becuase Japan, among non-European countries, is the first country which has become a member of OECD. Here, we can learn many points from the developing efforts whether they are success or failure. These efforts, including development assistance, are connected to Japanese society of today. On the other hand, Japan currently faces such new issues as rapid aging and depopulation. Thus this course discusses Japanese experience of social development from the above aspects.</p> <p>lesson1 Guidance of the course lesson2 JICA chugoku center lesson3 Yuichiro Yoshida "Japanese policy experience: Success and Failures" lesson4 Masaru Ichihashi "Industrial Policy and Economic growth" lesson5 Junyi Zhang "History of environmental policies in Japan"¹ lesson6 Junyi Zhang "History of environmental policies in Japan"² lesson7 Osamu Yoshida "Japanese ODA and its Asia Policy" lesson8 Mari Katayanagi "Reconstruction of Hiroshima from Peacebuilding Perspective"</p>	<p>Splendor Plan 2017</p> <p>SDGs</p> <p>SDGs</p>
