As of April 1, 2020

For entrants in FY 2020

Appended Form 1

Specifications for Major Program

Name of School (Department) [Integrated Arts and Sciences(Integrated Global Studies)]

Program name (Japanese)	国際共創プログラム
(English)	Integrated Global Studies

1. Degree Awarded : Bachelor of Arts and Sciences

2. Overview

The program of Integrated Global Studies has three basic principles – integrated thinking, global vision, and cooperative action – with the aim of fostering professionals who are able to discuss the various challenges facing international society from a global perspective, overcoming the differences that exist between nations, ethnic groups, cultures, and religions, and to engage in cooperative action with others. It encourages students to enhance their command of English and Japanese for communication, and offers a specialized education built on a foundation of a liberal arts education.

As such, students acquire the basic knowledge and methodologies of various academic fields through their study of the multidisciplinary subjects in the School of Integrated Arts and Sciences. This is intended to form the basis from which they will be able to discuss the various problems facing international society. Based on these, they take IGS subjects from three fields – *Culture and Tourism*, *Peace and Communication*, and *Environment and Society* – in order to acquire the knowledge and skills required for the practice of integrated global studies. This program values the student's self-initiative in choosing courses: students can either balance the three fields in order to acquire a core of knowledge and skills, or they can focus on subjects based on one field according to their respective goals and interests.

In addition, in this program, students from various nationalities and language backgrounds study together using English as a common language. The classes often employ group discussion and active learning. The students work and learn in English, in collaboration with students from different nationalities, in order to eventually acquire the flexibility and cooperative attitude necessary for working together with people from diverse cultural and religious backgrounds, an attitude of respect for different cultures, great sensitivity, and the ability to negotiate and express opinions in English.

Students who have obtained such capabilities can choose their career path in the future as follows; they can work in leadership roles in international institutions or companies that are growing internationally, and in government organizations in their own native countries; they can also work as researchers by going on to graduate school, in Japan or overseas, to continue their studies into the various challenges facing international society.

Academic achievements of Integrated Global Studies (IGS) Program

The evaluationand areas of specialization.

		Being able to fully understand, appropriately explain, and comprehend *one's own language and culture* and *other languages and cultures* that are prerequisite abilities for communication with peoples from different cultures and areas of specialization.	Being able to fully understand, explain, and comprehend *one's own language and culture* and *other languages and cultures* that are prerequisite abilities for communication with peoples from different cultures and areas of specialization.	Being able to understand, generally explain, and comprehend *one's own language and culture* and *other languages and cultures* which are prerequisite abilities for communication with peoples from different cultures and areas of specialization.
(3)	The knowledge and understanding to fully recognize the mutual relations and their importance among individual academic disciplines.	Being able to fully understand, recognize, and appropriately explain the mutual relations and their importance among individual academic disciplines.	Being able to fully understand, recognize, and explain the mutual relations and their importance among individual academic disciplines.	Being able to understand, recognize, and partially explain the mutual relations and their importance among individual academic disciplines.
(1)	The ability to collect and analyze necessary literature or data among various sources of information in individual academic disciplines.	Being able to fully collect and precisely analyze necessary literature or data among various kinds of information in individual academic disciplines.	Being able to fully collect and analyze necessary literature or data among various kinds of information in individual academic disciplines.	Being able to collect and partially analyze necessary literature or data among various kinds of information in individual academic disciplines.
(2)	The ability to specify necessary theories and methods for the consideration of important issues.	Being able to exactly specify necessary theories and methods for the consideration of important issues, and fully make use of them.	Being able to exactly specify necessary theories and methods for the consideration of important issues, and make use of them.	Being able to specify necessary theories and methods for the consideration of important issues, and partially make use of them.
(3)	The ability to summarize one's own research in reports or academic papers, deliver presentations at seminars or research meetings, and explain it in an easy way so that people in different cultures and areas of specialization understand.	Being able to summarize research results in reports or academic papers, deliver presentations at seminars or research meetings, and precisely explain it in an easy way so that people in different cultures and areas of specialization understand.	Being able to summarize research results in reports or academic papers, deliver presentations at seminars or research meetings, and explain it in an easy way so that people in different cultures and areas of specialization understand.	Being able to summarize research results in reports and academic papers, deliver presentations at seminars or research meetings, and partially explain it in an easy way so that people in different cultures and areas of specialization understand.
(1)	The ability to think in an interdisciplinary way to discover issues based on ethical research practices and subjective intellectual interests, and propose a plan to solve them.	Being able to take initiative to discover issues based on ethical research practices and subjective intellectual interests, and propose an effective plan to solve them based on interdisciplinary viewpoints.	Being able to take initiative to discover issues based on the ethics in research and subjective intellectual interests, and propose a plan to solve them based on interdisciplinary viewpoints.	Being able to discover issues based on the ethics in research and subjective intellectual interests, and partially propose a plan to solve them based on integrated viewpoints.
(2)	The ability to conduct research from a global perspective by combining knowledge, understanding, competence, and skills, based on flexible creativity and imagination.
