Appended Form 1

Specifications for Major Program

Name of School (Program) [School of Education, Cluster 5: Fundamentals for Education and Human Development] Program in Educational Studies]

| Program name | (Japanese) | |
|------------------|---------------------|---|
| | (English) | Educational Studies |
| 1. Academic Qual | lification to be Ac | quired: Bachelor's Degree (Educational Science) |

2. Overview

The Educational Studies Program provides systematic knowledge of education-related sciences with the aim of fostering professionals who have great insight in, and comprehensive judgment about, education.

Education is a complex process entangled in various factors related to people and society. Therefore, this program encourages students to study and learn various theories, ideas, phenomena, and problems from the perspectives of philosophy, history, sociology, and international studies; and to perform theoretical and practical examinations of groups of practical problems that surround educational methodology, skills and curriculum, school management, educational administration and finance, early childhood education, and social and life-long education.

After they complete the program, students are generally expected to go on to graduate school to undertake more advanced academic inquiries, or to work proactively in various fields as teachers, administrators (public service officers) and practitioners of international education-related development and cooperation, which will allow them to make use of their expertise in the educational sciences.

3. Diploma Policy (Policy for Awarding Degrees and Goals of the Program)

The Program in Educational Studies provides a systematic knowledge of education-related sciences with the aim of fostering professionals who have great insight and comprehensive judgment in relation to education. Therefore, this program awards a bachelor's degree in educational science to students who have obtained the standard number of credits set forth in the educational curriculum and acquired the following abilities:

- (1) An understanding of the various concepts and theories in the education-related sciences, and the ability to synthesize them from the perspective of human development.
- (2) A command of foreign languages, and the ability to make use of the various techniques of educational sciences such as data analysis, observation methods, and information processing.
- (3) The ability to make both analytical and critical judgments in discussing practical educational agendas using information gathering abilities and research methods (critical thinking).
- (4) The ability to continue developmental education-related research and to continue practice related to research and development, problem solving, policy planning and so on.

4. Curriculum Policy (Policy for Organization and Implementation of the Curriculum)

The program in Educational Studies encourages students to study and learn various theories, ideas, phenomena, and problems from the perspectives of philosophy, history, sociology, and international studies, and to perform theoretical and practical examinations of groups of practical problems that surround educational methodology, skills and curriculum, school management, educational administration and finance, early childhood education, and social and life-long education. In this program, in order to realize the goal of the program, we prepare an implement a curriculum according to the following policy:

1st Year: Students study liberal arts subjects in order to build up a foundation for their specialized education. They also study basic specialized subjects organized into eleven areas, from Philosophy of Education to Higher Education (Lec.), in order to acquire a fundamental knowledge of the education-related sciences.

2nd Year: While continuing to study liberal arts and basic specialized subjects, students take Basic Seminar in Area Courses organized into ten areas, from Philosophy of Education to Early Childhood Education, in order to

acquire both the ability to collect education-related materials, information, and data, and the ability to analyze and make judgments in relation to practical educational challenges. They also study specialized subjects related to research methods in some lectures of the Basic Seminar in Area Courses, in order to acquire a command of foreign languages and the research methodologies of education which will serve as a foundation for research and study. Based on their study up to this point of Basic Seminar in Area Courses and Comprehensive Seminar in Educational Science A, students are required to select one area, in line with their own research interests, to prepare for their studies in the 3rd Year and beyond.

3rd Year: While continuing Basic Seminar in Area Courses and the specialized education related to research methods, students will belong to a research laboratory focusing on one area, where they will take seminars in the area they have selected. They are encouraged to decide on the topic of their graduation thesis, under the individual or small-group guidance given by their mentor, in order to make a presentation on the concept of their graduation thesis during Comprehensive Seminar in Educational Science B.

4th Year: Students conduct research in their selected area in order to prepare for their graduation thesis. In doing this, they foster not only the abilities in research and development, and in policy planning, required for educational professionals, but also the ability to learn independently and to keep developing their skills and knowledge throughout their lifetime.

The results of learning will be evaluated both by academic assessment in the respective subjects and by the degree of achievement of the targets established for this educational program.

5. Starting Timing and Conditions

Students who have selected this program start learning in the 1st year.

6. Obtainable Qualifications

Licenses such as those for curators and school librarians can be obtained by additionally taking the relevant program.

Students can acquire the licenses of Class 1 Junior High School Teacher (Social Studies) and Class 1 High School Teacher (Civics) on the condition that they take the credits in teaching profession-related subjects, in accordance with the Education Personnel Certification Act.

7. Subjects and Lesson Contents

*For subjects, please refer to the subject lists given in Attachment 1.

*For lesson contents, please refer to the syllabus published every academic year.

8. Academic Results

At the end of each semester, the standard of evaluation will be explicitly stated for each evaluation item to show the level of achievement.

The academic result evaluation of each item will be converted as follows: S=4, A=3, B=2, and C=1. Based on the evaluation standard, calculated with the weighted value factored in, students learning results are classified as one of three levels - Excellent, Very Good, and Good - from the first semester of the 1st year to the present semester of the current year.

| Result Evaluation | Conversion |
|-----------------------|------------|
| S (90 points or over) | |
| A (80 to 89 points) | |
| B (70 to 79 points) | |
| C (60 to 69 points) | |

| Academic Results | Standard |
|------------------|-------------|
| Excellent | 3.00 ~ 4.00 |
| Very Good | 2.00 ~ 2.99 |
| Good | 1.00 ~ 1.99 |

- * Refer to the relationship between the evaluation items and evaluation standard in Attachment 2.
- * Refer to the relationship between the evaluation items and subjects in Attachment 3.
- * Refer to the curriculum map in Attachment 4.

9. Study in Graduation Thesis (Purpose, Assignment Method and Timing) Abilities in research and development, and in policy planning, are being required of educational experts more

than ever. The Program in Educational Studies places emphasis on the graduation study, requiring students to acquire eight credits to develop the aforementioned abilities.

Graduation research is mainly conducted through the following:

- 1) Seminars in the area courses and directed studies: These are the subjects in which students study monograph case studies that will lead to preparation of their graduation thesis. Tutoring is given individually or in a small group by each mentor.
- 2) Presentation: Students will be given the opportunity to make presentations to demonstrate their abilities in research and development, and in policy making, at the time of the announcement of their topic and at the time of their final examination.

<Assignment Timing and Method>

In the 4th semester, assignment guidance will be given through an introduction and tour of the research laboratories during Comprehensive Seminar in Educational Science A. Students will decide on their mentor (Laboratory) for the graduation thesis, and be assigned, during the 5th semester.

- 10. System of Responsibility
- (1) System of PDCA (Plan, Do, Check and Act)

This program is mainly implemented by staff members of the Program in Educational Studies, School of Education. The program head (head of the Program in Educational Studies) is responsible for its implementation. The group of teachers in charge of this program will make a plan, implement and evaluate it, and make improvements. The third-party evaluation will be made by the group in charge in the School of Education, in which they will evaluate the degree of attainment of the program and make recommendations.

- (2) Evaluation of the program
- * Feedback on the different levels of the program will be provided in order to evaluate the program itself with a view to improvement.
- A follow-up survey of graduates will be conducted in order to evaluate how their knowledge and abilities, gained through the study of this program, are being put to practical use in their career.
