- Note 1: The semester indicated with a circle mark represents that in which students typically take the subject. If they have failed to earn the credit in the semester, it is allowed to take the subject after the semester. It is required to confirm the semester in which the subject is provided in the class schedule for liberal arts education subjects that is published for every academic year, because some subjects might be provided in another semester than that indicated in this document.
- Note 2: The credit for "Field Research in the English speaking World" that is earned through such activities as a short-term study abroad, and that for "Online English Seminar A" and "Online English Seminar B" that are earned through self-study, are accepted as the credit for English required for graduation (6 credits). Only one credit for each subject is accepted (it is not allowed to earn the credit for the same subject two or more times). Achievement in a foreign language skill test and language training might be accepted as a credit. For the details, refer to the description regarding English subjects in liberal arts education in the Student Handbook.
- Note 3: Only when failing to earn the credit for "Introduction to Information and Data Sciences," the credit for the subject "Ground zero programming" or "Fundamental Data Science" is accepted as that for the disciplinary subjects required for graduation (2 credits).
- Note 4: Only when failing to earn the credit for "Psychology for Medical Care Workers," the credit for the subject "Introduction to Psychology A" or "Introduction to Psychology B" is accepted as that for the disciplinary subjects required for graduation (2 credits).
- Note 5: The students designated by the Program of Health Sciences must take the subject "Foundation physics for life science," "Foundation biology for life science," and/or "Fundamental Mathematics for Health Sciences."
- Note 6: For free elective subjects, it is required to earn 6 or more credits in Area Courses, basic foreign language subjects, information subjects, health and sports subjects, and society-related subjects, as well as Basic Subjects that are not specified in the required subject table, in addition to the required credits.
