Specifications for Major Program

Name of School (Program) [School of Dentistry, Program of International Dentistry]

Program name (Japanese)	
(English)	Program of Dentistry
Degree: Bachelor (Dentistry)	
<p>Outline</p> <p>The School of Dentistry provides the "Program for International Dentistry" based on a foundational philosophy that aims to educate dental medical staff to acquire cross-disciplinary, general, creative, and international capabilities. To enable students to achieve the targets defined for this program, education is provided according to the contents described below:</p> <ol style="list-style-type: none"> (1) Biodental education in the newly established academic framework that fuses life science and dental medicine and teaches the latest research methods, knowledge, and skills while respecting the existing academic frameworks of life science and dental medicine; (2) Education for developing dental medical staff who are able to collect and analyze required knowledge and information, update their thinking based on such knowledge and information in order to find comprehensive solutions to problems from a variety of points of view, and who possess a mindset that leads them to attempt to judge and act on their own responsibility and with deep humanity; and (3) Education that fosters expressiveness, comprehension, and a rich sensitivity for Japanese and foreign languages, and that develops capabilities for communication with and presentation to persons from different cultures and/or academic realms. 	
<p>Diploma policies (degree conferment policy & program attainment goals)</p> <p>The Program for International Dentistry will award a degree of Bachelor of Dentistry to students who, in addition to earning the required credits defined for the educational course, have acquired the capabilities described below:</p> <ol style="list-style-type: none"> (1) Deep humanity, an understanding of the professional responsibilities of a dentist, and the fundamental knowledge, skills, and attitude required for putting such responsibilities into practice; (2) Recognition of the importance of research, as well as possession of a scientific intelligence and creativity; (3) The ability to think critically and solve problems, as well as the ability to study continuously throughout life; (4) The ability to communicate appropriately with patients, their families, and the other medical staff; (5) A capability for coping with change in society and progress in science related to dental medicine; and (6) The ability to deepen empathy and understanding toward different cultures and scientific realms, as well as a capability for convincingly representing personal opinions in an international society. 	
<p>Curriculum policies (policies for organizing & providing curricula)</p> <p>To enable students to achieve the targets that are defined for the Program for International Dentistry, the educational courses are organized and executed according to the following policies:</p> <ol style="list-style-type: none"> (1) The liberal arts subjects are provided to enable students to establish the academic foundation required for the 	

specialized education, acquire academic and general knowledge, methodology, and points of view, and develop a deep humanity based on a wide-ranging intelligence and the normative consciousness required for medical staff.

- (2) Students are allowed to improve their basic English ability by taking foreign language subjects in the liberal arts education and practical English subjects provided in the specialized education. In addition to this, they join specialized educational subjects that are provided in both Japanese and English (Dual Linguistic Education), and study with students on the International Dental Course and short-term international students, in order to enhance their empathy and understanding toward the cultures of various countries and improve their international communication abilities.
- (3) The specialized education subjects provide biodental education for practicing dental medicine based on life science in order to enable students to acquire the basic knowledge and skills in life science and the specialized knowledge and basic clinical skills required for dentists; to enhance their understanding of scientific literacy, research ethics, and medical ethics; and to develop their scientific thinking abilities and creativity through practical dentistry research and education.
- (4) Students are encouraged to enhance their awareness as future dental practitioners through the practical clinical experience gained in early stages of the course, and to recognize both the importance of the establishment of good human relationships /F1 (el)ETQq4-44(r)38(t)5(udent)6(s)01(human enessgen] TJE,devshii(e)12(nal)6(et)

* See the syllabus announced in each fiscal year for class content.

Academic achievements

At the end of each semester, evaluation criteria will be shown with a clear indication of attainment levels according to the evaluation items for academic achievements.

numerically converted evaluations of their academic achievements (S = 4, A = 3, B = 2, and C= 1) in each subject being evaluated.

Evaluation of academic achievement	Converted values
S (Excellent: 90 points or higher)	4
A (Superior: 80 – 89 points)	3
B (Good: 70 – 79 points)	2
C (Fair: 60 – 69 points)	1

Academic achievement	Evaluation criteria
Excellent	3.00 – 4.00
Very Good	2.00 – 2.99
Good	1.00 – 1.99

* See the relationships between evaluation items and evaluation criteria on Attached Sheet 2.

* See the relationships between evaluation items and class subjects on Attached Sheet 3.

* See the Curriculum Map on Attached Sheet 4.

Academic achievements based on the Program (detailed knowledge, skills, and attitude)

- 1 Knowledge & understanding of liberal arts including the humanities and natural sciences
- 2 Knowledge of the principles of medicine
- 3 Knowledge regarding basic and clinical dental medicine
- 4 Knowledge regarding related areas of medicine
- 5 Knowledge of life sciences
- 6 Knowledge & understanding of foreign languages and foreign cultures

Abilities & skills

- 1 Basic skills for prevention, examination, inspection, diagnosis, and treatment of diseases in areas of dental medicine
- 2 Basic skills required for conducting experiments and presentations
- 3 Skills for appropriately collecting, selecting, organizing, and presenting information regarding life science and dental medicine

- 1 Rich humanity, understanding of professional responsibilities of a dentist, and general capabilities including basic knowledge, skills, and attitude required for putting such responsibilities into practice
- 2 Recognition of the importance of research, scientific intelligence, and creativity
- 3 Ability to think critically, solve problems, and engage in lifelong learning
- 4 Skills for appropriately communicating with patients, their families, and other medical staff
- 5 Ability for coping with change in society and progress in science related to dental medicine
- 6 Capabilities for coexisting and cooperating with persons from various cultures and regions, and for international communication

Graduation thesis (graduation research) (placement and method & time of assignment)

Students are not required to prepare a graduation theses.

Responsibility system

The dean room council and the faculty council of the School of Dentistry are engaged in planning for and execution of this course. For the processes of evaluation and action for improvement, the dean of the School of Dentistry consults with the dean room council and the faculty council of the School of Dentistry, and carries out the required actions while taking the results of the consultations into consideration.

Note 1 You can substitute the credits which you have obtained by taking the "Field Research in the English-speaking World" based on short-term language study abroad or other relevant program, or by taking the "Online English Course I, II & III" based on self-learning for English credits (6 credits) necessary for graduation. Also, there is a Credit Transfer System based on foreign language proficiency tests and language training.

Note 2 You have to select one language from German, French and Chinese.

Note 3 When failing to earn the credit for "Introduction to Information and Data Sciences" it is allowed to take the subject from courses in Information and Data Sciences Subjects.

Note 4 The subjects for which the credit is required to be earned are specified in the School of Dentistry. The credit for any subject that is not specified is not accepted as the credit required for graduation.
