  From the viewpoint described above, this program aims to provide general education regarding the fundamental
knowledge and technologies related to the production management and distribution of food, function evaluation and
advanced use of food material, and production and development of safe food with high quality and functionality to
develop human resources who can contribute to the creation of rich and healthy dietary life from a wide point of view.

Students study the fundamental subjects for one year after entering the university to acquire the basic knowledge required for studying the expertise. Then they mainly study the specialized fundamental subjects common for the all students of School of Applied Biological Science in the second semester of the second year. Particularly, they take the subjects of Laboratory Work in General Chemistry, Laboratory Work in General Physics, and Laboratory Work in General Biology I & II (including computer exercise) as those regarding experiments that are common for all students of the School of Applied Biological Science that consist of to get basic training for experiments in a wide area that is commonly required for the students of the School of Applied Biological Science. Students acquire a wide range of intelligence, capability in foreign languages such as English, data processing skills, basic knowledge common for the students of the School of Applied Biological Science, understanding for bioethics and ethics of science by the first semester of the second year to allow themselves to understand the aim and characteristics of each major program and select the most appropriate program.

O Instruction regarding credits

- Note 1: The year indicated with a circle mark represents that in which students typically take the subject. The year with a double circle mark indicates the year in which students are highly recommended to take the subject. Students are allowed to take the subject in any year after that indicated with a circle or double circle mark. It is required to confirm the semester in which the subject is provided in the class schedule for liberal arts education subjects in the Students' Handbook because some subjects might be provided in different semester from that which is provided in this document.
- Note 2: The credit for "Field Research in the English-speaking World" that is earned through such as a short-term study abroad and that for "Online English Seminar I," "Online English Seminar II," and "Online English Seminar III" that is earned through a self-study, are accepted as the credit for English required for graduation. Achievement in a foreign language skill test and language training might be accepted as a credit. For further information, refer to the description regarding English subjects in the liberal arts education and the item "Credit based on Achievement in Foreign Language Skill Test" in the Students Handbook.

(PP. 30 - 31, Liberal Arts)

Note 3: It is required to earn 4 credits or more for the natural science subjects and 4 credits or more for the human & social science subjects.

However, "Fundamentals of Biology" of the natural science subjects is a subject for which students are requested to take if he/she did not take biology subjects in the entrance exam (including the University Testing Center Examination).

For the other students, the credit for the subject "Fundamentals of Biology" is not accepted as that for graduation.

It is allowed to include up to 4 credits for society-related subjects as credits for the Human & Social Science Subjects.

Note 4: For health & sports subjects, it is recommended to take a practicum in sports.

Note 5: It is required to take "Basic Laboratory Work in Chemis

Name of faculty	Name of program and position	Extension number	Laboratory	Mail address
Satoru Ueno	Professor	7934	A106	sueno hiroshima-u.ac.jp
Tadashi Shimamoto	Professor	7897	A506	tadashis hiroshima-u.ac.jp
Takuya Suzuki	Professor	7984	A809	takuya hiroshima-u.ac.jp
Yoshio Hagura	Professor	7938	A108	hagura hiroshima-u.ac.jp
Kiyoshi Kawai	Professor	4366	A107	kawai hiroshima-u.ac.jp
Kenji Hosono	Professor	7959	B215	kjhosono hiroshima-u.ac.jp
Noriyuki Yanaka	Professor	7979	A609	yanaka@hiroshima-u.ac.jp
Shinichi Nishimura	Professor	7930	A803	nshin@hiroshima-u.ac.jp
Thanutchaporn Kumrungsee	Associate Professor	7980	A604	kumrung@hiroshima-u.ac.jp
Haruhiko Koizumi	Associate Professor	7935	A105	h-koizumi@hiroshima-u.a.cjp
Yosuke Chomei	Associate Professor	7960	B216	chomei@hiroshima-u.ac.jp
Tatsuya Nakayama	Associate Professor	7953	A508	t-nakayama@hiroshima-u.ac.jp
Makoto Hirayama	Associate Professor	7929	A802	hirayama hiroshima-u.ac.jp
Yoshinari Yamamoto	Assistant Professor	7932	A808	yamamo59 hiroshima-u.ac.jp
Yakabe Takafumi	Visiting Professor			Class Science and Technology for Food Development
Akinobu Ono	Visiting Professor			Class Science and Technology for Food Development
Kazuyoshi	Visiting			Class Food Information Management,
Matsumura Tsurunaga Yoko	Professor Visiting Professor			Class Agricultural Food
