

Graduate School	Graduate School of Integrated Sciences for Life	
Major	Department of Integrated Sciences for Life	
Program	Program of Biotechnology Program of Food and AgriLife Science Program of Bioresource Science Program of Life and Environmental Sciences Program of Basic Biology Program of Mathematical and Life Sciences Program of Biomedical Science	
Application Period	October 18, 2023 - December 22, 2023	
Required Documents	(1) Application forms <prescribed form> (2) Academic records (3) Certificate of Student Status (4) Certificate of TOEFL/TOEIC/IELTS score, and/or Japanese-Language-Proficiency (JLP) test N1/N2 score certificate (5) Master thesis (research) outline <free form> (6) Original letter of recommendation addressed to Dean of the Graduate School of Integrated Sciences for Life, Hiroshima University from President/Dean of the applicant's current university in China <free form> * The documents (1) (2) (3) (5) (6) should be written in English or Japanese, or should be accompanied by Japanese translation, in which the name, position, and contact information of the translator are specified.	
Selection Method	After initial document screenings, applicants will be interviewed through the internet at the designated test site, Hiroshima University Beijing Research Center.	
Examination Day	One day specified by the University between November 13, 2023 and January 9, 2024	
Admission Semester	October 1, 2024 / April 1, 2024* (* Only for the privately financed students already enrolled in master's degree programs in Japanese universities.)

	Program of Biomedical Science	
Words	Program Outline Research Key	The Graduate School of Integrated Sciences for Life has a single division, which consists of seven fundamental graduate degree programs. The seven programs, each of which features a systematic curriculum framework, are established by separating a broad spectrum of biology and life sciences – which used to be divided into the four traditional academic disciplines of science, engineering, agriculture and medicine – from the viewpoint of educational effects and the needs of modern society. Each of these seven programs has distinctive keywords and shares some of them with other diploma programs, thereby enabling the formation of a group of complementary and integrated programs.
