

The 4th International Symposium on Food and Environment

"The recovery of agriculture and fisheries from natural disasters"

Date: 5 November (Sat.) 13:00 - 16:30

Venue: C206, Faculty of Applied Biological Science

Recently, natural disasters such as the Sumatra earthquake, tsunami and volcanic eruptions in Indonesia, the big Sichuan earthquake in China, the Indian Ocean earthquake and tsunami in Thailand as well as the most recent Tohoku earthquake and tsunami in Japan attacked on agriculture and fisheries facilities in Asia.

In this symposium, we would like to compare information on the various impacts of natural disaster, and discuss the critical role of universities and research institutions in the remediation and recovery efforts to help stabilize food production in these countries.

13:00 Part 1

Effects of the 2004 Indian Ocean tsunami and recovery on aquaculture and fisheries in Thailand

Methee Kaewnern (Kasetsart University)

Recovery of the fishery sector for "Build Back Better" after the 2004 tsunami: Lessons learned from livelihood activities in fishing community, Nangroe Aceh Darussalam (NAD), Indonesia

Achmad Zamroni (Hiroshima University)

Post-disaster (The 2011 East Japan Disaster) recovery plans in Miyagi: Reconstruction of macroalgae aquaculture and new development of microalgae production

Hiroshi Sasaki (Senshu University)

14:40 Coffee break

Poster presentation of the research supported by the 2010 Grant-in-aid from Dean

15:00 Part 2

International agricultural assistance in the 5.12 Wenchuan Earthquake areas: Is agro-input voucher the answer?

Yuansheng Jiang (Sichuan Agricultural University)

Lesson-learned and approach in recovering agricultural practices after natural disasters in Indonesia

Didik Indradewa (Gadjah Mada University)

16:00 General Discussion

This symposium is counted for students as 3 times of Science Seminar [Kyodo Seminar].
